LJ SCHOOL OF COMPUTER APPLICATIONS

LJSCA is offering three Professional degrees in Computer Applications and Computer Sciences. The programmes are inclined towards application development, emphasizing on the latest programming languages and tools for better and faster perspectives. These courses are meant for fulfilling the growing demands for qualified professionals in the field of Information Technology (IT) and Computer Science. The school strives for an elevated education beyond the basic curricula by inculcating the spirit of companionship, cooperation, and being helpful to society. It spares no stone unturned in achieving its goal of giving sincere, truly dedicated and well-trained IT professionals to the nation.

Vision

L J School of Computer Applications envision to develop a globally competitive workforce and entrepreneurs by transferring life through excellence in education and nurturing creativity, scholarship and innovation.

Mission

1. To provide value based education through multigrade teaching methodology and advance education facilities to enable students to acquire the global competency.
2. To provide professional services to industries and communities through educational, technical, and professional activities.
3. To provide affordable education with academic excellence and transparent evaluation system.
4. To impart domain knowledge, critical thinking, and contemporary skills through problem solving practical training and design & development of innovative projects.
5. To instill and nurture sense of ethics and universal values in students.
6. To promote and support research and innovation in fields of computer science and allied field.

STUDENTS PARENTS SUPPORT SERVICES

We provide students with a range of experiences and opportunities that promote their overall development. This includes not only academic instruction, but also extracurricular activities, community service, sports, and arts programs.

We provide assistance for MOOCs offered by various platforms such as Coursera, IIT, NPTEL, Swayam, and many more.

Our teaching methodology is flexible and can be module-based or training-based, depending on the requirements of the students. This approach enables students to have a thorough understanding of the subject matter.

We have over 1500 PCs that are exclusively dedicated to students to work individually during sessions, and we also provide more than 200 laboratory hours per semester for each student.
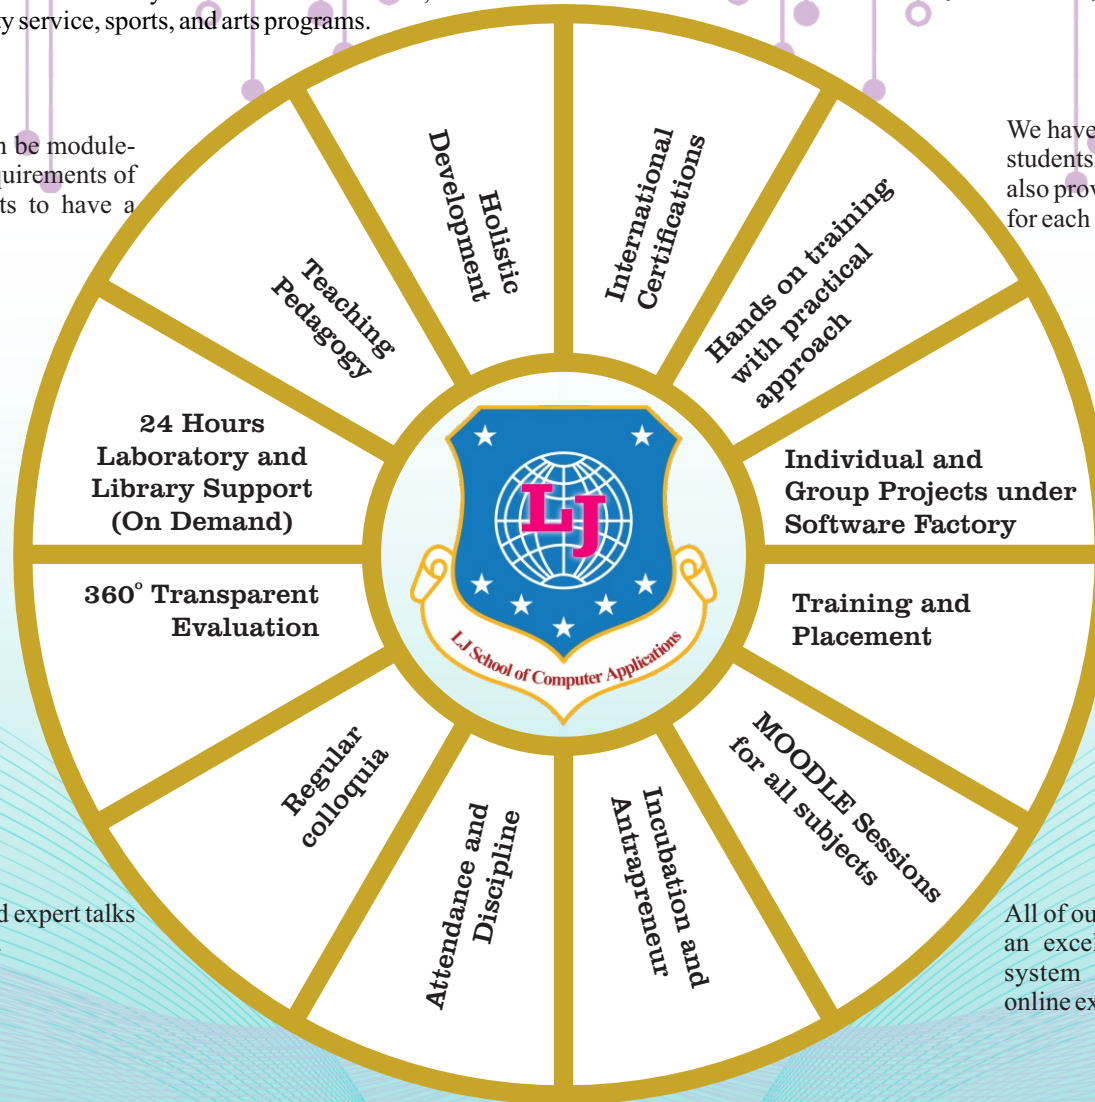

We encourage students to utilize our laboratory and library facilities even after college hours.

Students are required to create at least one software project per semester, as part of their coursework, they have the option to work on a live project and publish it online with the support of the software factory

Our evaluation system is 100% transparent, and we provide students with access to their answer sheets. Additionally, they have the option to cross-check their papers with those of their peers.

We provide placement assistance to all students starting from their first year. More than 350 companies visits every year.

We organize over 50 seminars, workshops, and expert talks every year that are relevant to the field of study.

All of our sessions are recorded on MOODLE, which is an excellent online support tool for students. This system includes video sessions, assignments, and online exam features that are available to all students.

We have a daily attendance monitoring system for each session, and reports are sent to the designated mobile numbers. Additionally, we provide mentoring and counseling services to all students.

Students have the opportunity to become entrepreneurs either individually or by joining a group in any field of their choice.

TESTIMONIALS

Constant adaptation to the dynamic world is evidently important for an individual to survive. LJ served as a catalyst for me personally, preparing me to adapt to the situations quickly and aptly and function at my optimum potential. The opportunity to become a better version of self, is up for grabs at every corner of this institute. I was fortunate enough to have capitalized on it, thus expanding my learning horizon through internships, clubs and committees and peer learning. I garbed the highest package from my college which has been a life-changing. With access to top-tier job opportunities and mentorship programs, I have excelled in my field and achieved my career goals. I am grateful for the investment my college has made in my future.

Niraj
IMCA

LJ School of Computer Applications is great place to learn. It gives me a great pride to say that I have completed my MCA from this place. The relationship between faculties and student is very cordial, which gave me an opportunity to excel in my area of interest. They even provide me with an opportunity to enhance my skill and enriched my knowledge. The Industry Interaction and Placement Cell is very supportive and they have conducted various sessions which helped me to get placed. I cherish each moment spent at the college, extra-curricular activities and will remember these moments forever.

Preyansh
MCA

LJ College life remains a memorable time for all of us. Our College is a mixture of study, fun, activities and Memories. The College has well talented staff, many labs and well equipped library. Mainly the faculties are good natured and supportive enough. They are always ready to help the students in studies and also in other activities like projects or extracurricular activities. Faculties are very friendly with all the students with whom it is very easy to share personal problems and happy moments. It has a very good atmosphere, nice canteen and many gardens. It organizes many functions like hackathon, innovation village, annual function, garba function and spots day etc, regularly. It is one of the best colleges across Gujarat
