

One Day Workshop on PLC

Electrical-EC-Automation & Robotics Engineering (Semester-V)

We are delighted to announce a specialized workshop tailored for students, focusing on Programmable Logic Controllers (PLC). This workshop is designed to provide students with a profound understanding of PLC technology and its pivotal role in industrial automation. During this hands-on workshop, participants will have the unique opportunity to work with actual PLC systems, learning how to program, configure, and troubleshoot them. The practical skills acquired in this workshop will be invaluable for students pursuing careers in engineering, automation, or related fields.
