2. Prerequisites

- ✓ Design architectural projects concerning town planning rules and regulations.

3. Rationale

A properly planned town infrastructure helps in utilizing the land's capability and resources to their maximum. These structures include schools, hospitals, markets, parks, etc. Town residents seek that all the facilities are in most nearby locations. The town planning includes all these things and a suitable selection of land area which is most appropriate for the residential, good environment, location and connecting distance with the roads & highways. The student must have insight knowledge about city planning leading towards the development of a modern town. The course will provide a practical understanding of the basic planning of urban region and the built environment and their applications and relationships to the planning and management of urban and regional environments and associated land use.

4. Objectives

- ✓ Appreciate town planning schemes.
- ✓ Explain the tools of town planning.
- ✓ Explain different components of town and their effect on town planning.
- ✓ Describe the facts relating to the industrial areas of a town.
- ✓ Describe the aspects involved in a development plan.
- ✓ Demonstrate different features of traffic management.
- ✓ Apply land-use regulation for planning issues.
