LOK JAGRUTI UNIVERSITY (LJU)

INSTITUTE OF ENGINEERING AND TECHNOLOGY

Department of Computer Engineering (701)

Bachelor of Engineering (B.E.) – Semester – III

| Course Code: | 017011391 | | Teaching Scheme | | | | | |
|----------------------|--|--|-----------------|---|------------------|--------|----------------|--|
| Course Name: | Course Name:Introduction to Probability Theory and Stochastic ProcessesCategory of Course:Basic Science Course (BSC) | | | | Practical (P) | Credit | Total Hours | |
| Category of Course: | | | | | 0 | _ | 70 | |
| Prerequisite Course: | Mathematics- I (017011191), Mathematics- II (017011291) | | 3 | 2 | 0 | 5 | 50 | |

| | Syllabus | | | | | | | |
|-------------|--|---|------------------|-------------------|--|--|--|--|
| Unit No. | Торіс | Prerequisite Topic | Successive Topic | Teaching Hours | | | | |
| | Basic Probability1.1 Basic Definitions: Random Experiment, Outcome, Trial, Event, Exhaustive Event, Mutually Exclusive Event, Equally Likely Event, Independent Events, Favorable Events. | | | 6 | | | | |
| 01 | 1.2 Definitions of Probability: Classical & Axiomatic, Sample Space, Theorems on Probability: De Morgan's Laws, Addition Theorem, Examples. | | | (11%) | | | | |
| | 1.3 Conditional probability, Multiplicative Theorem for Independent Events, Bayes' Theorem, Examples. | | | | | | | |
| | Random Variables | | | | | | | |
| | 2.1 Random variables, Discrete Random Variable, Probability Mass Function, Discrete Distribution Function, Mathematical Expectation, Variance. | Basic Differentiation and Integration (017011191-Unit- 3.4) | | 6 | | | | |
| 02 | 2.2 Continuous Random Variable, Probability Density Function, Continuous Distribution Function, Mathematical Expectation, Variance. | Probability Density Function (017011391-Unit-2) | | (9%) | | | | |
| | 2.3 Two Dimensional Discrete Random Variables, Joint Probability Mass Function, Cumulative Distribution Function, Marginal Probability Function, Conditional Probability Function. | Multiple Integral (017011191- Unit-7.1) | | | | | | |
| | Basic Statistics | | | | | | | |
| 03 | 3.1 Measure of Central Tendency: Mean, Median and Mode. | | | - | | | | |
| | 3.2 Mean: Mean for Individual Observations, Mean for Discrete Frequency Distribution, Mean for Continuous Frequency Distribution, Mean from Assumed Mean, Mean from Step Deviation. | | | | | | | |
| | 3.3 Median: Median for Individual Observations, Median for Discrete Frequency Distribution, Median for Continuous Frequency Distribution (Less than and Greater than types) | | | 5 | | | | |
| | 3.4 Mode: Mode for Individual Observations, Mode for Discrete Frequency Distribution, Mode for Continuous Frequency Distribution. | | | (10%) | | | | |
| | 3.5 Measures of Dispersion: Standard Deviation & Variance. | | | | | | | |
| | 3.6 Moments: Row Moments, Central Moments, Relation Between Row and Central Moments. | | | - | | | | |
| | 3.7 Skewness, Karl- Pearson's Co-efficient of Skewness, Kurtosis. | | | | | | | |
| | Correlation and Regression | | | | | | | |
| 04 | 4.1 Correlation, Types of Correlation, Karl Pearson's Correlation Co-efficient, Properties of Correlation Co-efficient. | | | 6 | | | | |
| | 4.2 Rank correlation, Spearman's Rank Correlation Co- efficient, Tied Rank. | | | o (10%) | | | | |
| | 4.3 Regression, Types of Regression, Lines of Regression, Regression Co-efficient, Properties of Regression Co-efficient & Regression Lines. | | | | | | | |
| | Binomial and Poisson Distributions | | | | | | | |
| | 5.1 Binomial Distribution, Conditions for Binomial | | | 1 | | | | |
| | Distribution, Bernoulli's Trail, Recurrence Relation for | | | 4 | | | | |
| 05 | Binomial Distribution, Binomial Frequency Distribution. | | | (10%) | | | | |
| | 5.2 Poisson Distribution, Conditions for Poisson Distribution, | | | | | | | |
| | Recurrence Relation for Poisson Distribution, Poisson Frequency Distribution. | | | | | | | |
| | Normal and Exponential Distributions | | | | | | | |
| 06 | 6.1 Introduction to Normal Distribution. | | | 4 | | | | |
| | 6.2 Normal Distribution, Examples. | | | (9%) | | | | |

| | 6.3 Properties of Normal Distribution. | Basic Differentiation and | | | | | | |
|----|--|-------------------------------|-------------|-------------|--|--|--|--|
| | 6.4 Introduction to Exponential Distribution. | Integration (017011191-Unit- | | | | | | |
| | 6.5 Exponential Distribution, Examples. | 3.4) | | | | | | |
| | Applied Statistics: Testing of Hypothesis for Large Samples | | | | | | | |
| | 7.1 Formation of Hypothesis, Null Hypothesis, Alternative | | | | | | | |
| | Hypothesis, Terms Related to Test of Hypothesis, Procedure | | | 5 | | | | |
| 07 | for Testing of Hypothesis. | | | (11%) | | | | |
| 07 | 7.2 Test of significance for Large Samples: Single Proportion, | | | (11/0) | | | | |
| | Difference of Proportions. | | | | | | | |
| | 7.3 Test of significance for Large Samples: Single Mean, | | | | | | | |
| | Difference of Means, Difference of Standard Deviations. | | | | | | | |
| | Applied Statistics: Testing of Hypothesis for Small Samples | | | | | | | |
| | 8.1 Student's t- Distribution, t- Test of significance: Single | | | 5 | | | | |
| 08 | mean, Difference of Means, Correlation Co- efficient. | | | (10%) | | | | |
| | 8.2 Snedecor's F- test for Ratio of Variances. | | | (10/0) | | | | |
| | 8.3 Chi-square Test for Goodness of Fit and independence of | | | | | | | |
| | Attributes. | | | | | | | |
| | Curve fitting by the Numerical Method | | | 4 | | | | |
| 00 | 9.1 Introduction, Least Square Method, Fitting of Linear | | 4 (110/) | | | | | |
| 09 | Curves. | Matrices (017011291-Unit-1.3) | | (1170) | | | | |
| | 9.2 Fitting of Quadratic Curves | | | | | | | |
| | Introduction to Stochastic Processes | | | | | | | |
| 10 | 10.1 Definitions and Properties. | | | 5 (0%) | | | | |
| 10 | 10.2 Discrete Markov Chain, Continuous Markov Chain. | | | (9%) | | | | |
| | 10.3 Stochastic Gradient Descent. | | | | | | | |

| Proposed Theory + Practical Evaluation Scheme by Academicians (% Weightage Category Wise and it's Marks Distribution) | | | | | | | | | |
|--|--|----------------------------|---|-------------|-----------------|--|--|--|--|
| L: | 3 | Т: | 2 | P: | 0 | | | | |
| Note: In Theory Grou Each Test will be of 2 Each Test Syllabus W | 1p, Total 4 Test (T1- 5 Marks. /eightage: Range sh | +T2+T3+T ould be 20 | 54) will be conducted for each subject.% - 30% | | | | | | |
| Group (Theory or Practical) | Group (Theory or Practical) Credit | Total Subject Credit | Category | % Weightage | Marks Weightage | | | | |
| Theory | | | MCQ | 25% | 25 | | | | |
| Theory | 5 | | Theory Descriptive | 0% | 0 | | | | |
| Theory | 5 | | Formulas and Derivation | 0% | 0 | | | | |
| Theory | 7 | | Numerical | 75% | 75 | | | | |
| Expected Theory % 100% | | 4 | Calculated Theory % | 100% | 100 | | | | |
| Practical | ctical | | Individual Project | 0% | 0 | | | | |
| Practical 0 | | | Group Project | 0% | 0 | | | | |
| | | | Internal Practical Evaluation (IPE) | 0% | 0 | | | | |
| Practical | Practical Practical | | Viva | 0% | 0 | | | | |
| Practical | | | Seminar | 0% | 0 | | | | |
| Expected Practical % | 0% | | Calculated Practical % | 0% | 0 | | | | |
| Overall % | 100% | | | 100% | 100 | | | | |

| Course Outcome | Course | Outcome |
|----------------|--------|---------|
|----------------|--------|---------|

| 1 | Understand the basic Definitions of Random Experiment, Mutually Exclusive Event, Equally Likely Event, Independent Events, Favorable |
|-------|--|
| | Events.Definitions of Probability: Classical & Axiomatic,Sample Space, Theorems on Probability: De Morgan's Laws.Conditional probability, |
| | Multiplicative Theorem for Independent Events, Bayes' Theorem, Understand the Random variables, Discrete Random Variable, Probability Mass |
| | Function, Discrete Distribution Function, Mathematical Expectation, Variance. Two Dimensional Discrete Random Variables, Joint Probability Mass |
| | Function, Cumulative Distribution Function, Marginal Probability Function, Conditional Probability Function. Measure of Central Tendency: |
| | Understand the Basic Statistics, Mean, Median and Mode. Measures of Dispersion, Moments, Skewness and Kurtosis. |
| 2 | Understand the basic Definitions of Correlation and Regression, Properties of Correlation Co-efficient. Rank correlation, Tied Rank. Properties of |
| | Regression Co-efficient & Regression Lines.Introduction to Binomial and Poisson Distributions,Binomial and Poisson Frequency Distribution. |
| 3 | Introduction to Normal and Exponential Distributions and its properties, Applied Statistics: Testing of Hypothesis for Large Samples, Formation of |
| | Hypothesis, Null Hypothesis, Alternative Hypothesis, Test of significance for Large Samples: Single Proportion, Difference of Proportions. Single |
| | Mean, Difference of Means, Difference of Standard Deviations. |
| 4 | Introduction to Applied Statistics: Testing of Hypothesis for Small Samples, Student's t- Distribution, t- Test of significance: Single mean, Difference |
| | of Means, Correlation Co- efficient. Snedecor's F- test for Ratio of Variances. Chi-square Test for Goodness of Fit and independence of |
| | Attributes.Understand the fitting of various curves by method of least square and Understand the Stochastic processes, Definitions and Properties of |
| | Discrete Markov Chain, Continuous Markov Chain.Stochastic Gradient Descent. |
