| Course  | Course Outcome   |  |  |  |  |
|---------|--|--|--|--|--|
|         | Upon completion of the course students will be able to   |  |  |  |  |
| CO1     | Develop the ability to identify various types of pollution such as air pollution, water pollution prevalent in society, comprehensively understanding  |  |  |  |  |
|         | their sources and the consequential impacts on both human health and the environment.  |  |  |  |  |
| CO2     | Develop the ability to identify noise pollution, their sources and effect on human and environment. Acquire an in-depth understanding of different solid and bio medical waste management strategies and their crucial significance in preserving both human health and the environment. |  |  |  |  |
| CO3     | Understanding of various futuristic challenges such as e-waste and critical issue related to climate change, gaining insights into global initiatives and efforts aimed at addressing this critical environmental challenge.   |  |  |  |  |
| CO4     | Examine the role of eco-friendly technology in fostering sustainable development, considering both environmental and social implications.  |  |  |  |  |
