# LOK JAGRUTI UNIVERSITY (LJU)

# **INSTITUTE OF ENGINEERING AND TECHNOLOGY**

### **Department of Artificial Intelligence and Data Science (705)**

### **Bachelor of Engineering (B.E.) – Semester – II**

Course Code:	017051291		Teaching Scheme				
Course Name:	Mathematics - II		Lecture (L)	Tutorial (T)	Practical (P)	Credit	Total Hours
Category of Course:	Basic Science Course (BSC)		3	2	0	5	50
Prerequisite Course:	Mathematics - I (017051191)						

	S	yllabus			
Unit No.	Торіс	Prerequisite Topic	Successive Topic	Teaching Hours	
	Matrices				
	1.1 Elementary row operations of matrices    Divide & Conquer (017053591-				
	1.2 Row and reduced row echelon form		Unit-3)		
	1.3 System of linear equations		-	7	
01	<ul><li>1.4 Homogeneous system of linear equations</li><li>1.5 Non-homogeneous system of linear equations</li></ul>			(14%)	
Ŭ1	1.6 Inverse of Matrix (Using Gauss-Jordan Method)		Cryptography(017053791-Unit- 2)	ì í	
	1.7 Eigen values & vectors				
	1.8 Diagonalization of matrix (Only for Non-symmetric Matrix)	Factorization(017051191-Unit-			
	1.9 Cayley-Hamilton theorem	1)			
	Fourier Series				
	2.1 Periodic function			5	
	2.2 Dirichlet's condition			(10%)	
02	2.3 Trigonometric series of sine and cosine function	Basic integration (017051191-		()	
	2.4 Fourier series of a function of period 2L	Unit-3)		_	
	2.5 Fourier series of even and odd function	-			
	2.6 Half range expansions				
	Some Special Functions	-			
	3.1Gamma function, Beta function. (And its Properties)				
	3.2 Bessel function, Dirac's Delta function (Definition only)				
03	3.3 Error function and complementary Error function (Definition only)				
	3.4 Heaviside's function, pulse unit height and duration function (Definition only)			4 (8%)	
	3.5 Rectangle function, Gate function (Definition only)				
	3.6 Signum function, Saw tooth wave function (Definition only)				
	<ul><li>3.7 Triangular wave function, Halfwave rectified sinusoidal function, Full rectified sine wave, Square wavefunction.</li><li>(Definition only)</li></ul>				
	Fourier Integral and Fourier Transform	<u> </u>	·		
	4.1 Define Fourier integral			4	
04	4.2 Cosine and sine integral	Basic integration (017051191-		(8%)	
	4.3 Define Fourier transform	Unit-3)			
	4.4 Cosine and sine transform				
	First Order Ordinary Differential Equations				
	5.1 Geometric meaning of $y' = f(x, y)$ direction fields			5	
05	5.2 Exact differential equations and integrating factor	Basic differentiation &		(10%)	
	5.3 Linear differential equations				
	5.4 Bernoulli equations	integration(017051191-Unit-3)			
	Higher Order Ordinary Differential Equations				
	6.1 Linear differential equations of second and higher order			-	
	6.2 Homogeneous linear differential equations of higher order				
	6.3 Higher order non-homogeneous equations				
	6.4 Solution by undetermined coefficients	Factorization(017051191-Unit-			
	6.5 Solution by variation of parameters	1)			
	6.6 Solution by $[1/f(D)] r(x)$ method for finding particular			7	
06	integral.	Colution have dated in 1		(14%)	
	6.7 Ordinary differential equations with variable coefficient (Reducible to constant coefficient) (Cauchy-Euler's & Legendre's Equation)	Solution by undetermined coefficients (017051291-Unit- 6), Solution by [1/f(D)] r(x) method for finding particular integral (017051291-Unit-6)			

Modeling of Ordinary Differential Equations				
7.1 Orthogonal trajectories of curves (Only Cartesian Curves)	First order ordinary differential equations (017051291-Unit-5)		3 (6%)	
7.2 Oscillations and resonance (For undamped Forced Oscillations)	Higher order ordinary		(0 / 8)	
7.3 Modeling: Electric Circuits (Only RLC-Circuit)	(017051291-Unit-6)			
Power Series				
8.1 Classification of singularities				
8.2 Series solution near ordinary points			(10%)	
8.3 Series solution near regular singular points				
(Frobenius Method)				
Laplace Transform				
9.1 Laplace transform of elementary functions				
9.2 Differentiation of Laplace transform          9.3 Integration of Laplace transform				
	integration(017051191-Unit-3)			
			I	
9.8 Convolution theorem				
Application of Laplace Transform				
	Laplace transform of			
10.1 Solution of linear ordinary differential equation		3		
		(6%)		
	-			
10.2 Solution of simultaneous equations				
	7.2 Oscillations and resonance (For undamped Forced Oscillations)         7.3 Modeling: Electric Circuits (Only RLC-Circuit) <b>Power Series</b> 8.1 Classification of singularities         8.2 Series solution near ordinary points         8.3 Series solution near regular singular points (Frobenius Method) <b>Laplace Transform</b> 9.1 Laplace transform of elementary functions         9.2 Differentiation of Laplace transform         9.3 Integration of Laplace transform         9.4 Laplace transform of derivatives         9.5 Laplace transform of integrals         9.6 Unit step function and Dirac's delta function         9.7 Inverse Laplace transform         9.8 Convolution theorem <b>Application of Laplace Transform</b> 10.1 Solution of linear ordinary differential equation	7.1 Orthogonal trajectories of curves (Only Cartesian Curves)       First order ordinary differential equations (017051291-Unit-5)         7.2 Oscillations and resonance (For undamped Forced Oscillations)       Higher order ordinary differential equations (017051291-Unit-5)         7.3 Modeling: Electric Circuits (Only RLC-Circuit)       (017051291-Unit-6)         Power Series         8.1 Classification of singularities          8.2 Series solution near ordinary points          8.3 Series solution near regular singular points          8.3 Series solution near regular singular points          9.1 Laplace Transform          9.2 Differentiation of Laplace transform          9.3 Integration of Laplace transform       Basic differentiation & integration (017051191-Unit-3)         9.6 Unit step function and Dirac's delta function          9.7 Inverse Laplace transform          9.8 Convolution theorem       Laplace transform of elementary differential equation         10.1 Solution of linear ordinary differential equation       Laplace transform of elementary differential equation         10.1 Solution of linear ordinary differential equation       Laplace transform of elementary functions, Laplace transform of elementary functions, Laplace transform of elementary functions, Laplace transform of elementary function and Dirac's delta function	7.1 Orthogonal trajectories of curves (Only Cartesian Curves)       First order ordinary differential equations         7.2 Oscillations and resonance (For undamped Forced Scillations)       Higher order ordinary differential equations         7.3 Modeling: Electric Circuits (Only RLC-Circuit)       (017051291-Unit-5)         Power Series         8.1 Classification of singularities          8.2 Series solution near ordinary points          8.3 Series solution near ordinary functions          9.1 Laplace Transform          9.2 Differentiation of Laplace transform          9.4 Laplace transform of delivatives       Basic differentiation &         9.4 Laplace transform of derivatives          9.4 Laplace transform          9.5 Laplace transform          9.6 Unit step function and Dirac's delta function          9.7 Inverse Laplace transform          9.8 Convolution theorem          10.1 Solution of linear ordinary differential equation       Laplace transform of elementary functions, Laplace transform          10.2 Solution of simultaneous equations       Laplace transform of elementary function, Inverse Laplace transform          9.7 Inverse Laplace transform	

<b>Proposed Theory + Practical Evaluation Scheme by Academicians</b>					
(% Weightage Category Wise and it's Marks Distribution)					
L:	3	<b>T:</b>	2	<b>P:</b>	0
<b>Note: In Theory Grou</b>	1p, Total 4 Test (T1+	-T2+T3+T	4) will be conducted for each subject	•	
Each Test will be of 2	5 Marks.				
Each Test Syllabus W	eightage: Range sho	ould be 20%	% - 30%		
Group (Theory or Practical)	Group (Theory or Practical) Credit	Total Subject Credit	Category	% Weightage	Marks Weightage
Theory			MCQ	15%	15
Theory	_		Theory Descriptive	0%	0
Theory	5		Formulas and Derivation	10%	10
Theory			Numerical	75%	75
Expected Theory %	100%	5	Calculated Theory %	100%	100
Practical			Individual Project	0%	0
Practical			Group Project	0%	0
Practical	0		Internal Practical Evaluation (IPE)	0%	0
Practical	]		Viva	0%	0
Practical			Seminar	0%	0
Expected Practical %	0%		Calculated Practical %	0%	0
Overall %	100%			100%	100

Cours	e Outcome
	Upon completion of the course students will be able to
CO1	Understand and apply matrix operation and properties, solve systems of linear equations using matrices, analyze systems using eigen values and eigne vectors, apply matrices in signal processing tasks, Explain the concept of Fourier series and its properties, Apply Fourier series in digital communications and image processing also in control system analysis.
CO2	Design filter and modulation schemes and Implement algorithms like FFT for efficient computation of Fourier transforms, Apply Bessel functions and other special function to solve engineering problems. Solve first order & first degree ODEs using various methods.
CO3	Solve higher order linear ODEs using various methods such as undetermined coefficients, variation of parameters. Formulate ODEs from real-world engineering problems. Apply knowledge of ODEs to design and analyze systems in computer engineering domains. Apply orthogonal trajectories in edge detection algorithms for image processing and utilize for curve fitting and surface modeling in computer graphics. Understand the significance of ordinary and singular points in ODEs.
CO4	Understand and apply Laplace transforms to solve linear ODEs with constant coefficients. Apply knowledge to real-world engineering problems, especially in signal processing, circuit analysis, control system and system modeling.
